ELECTION/RESTRICTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to CYP3A4 nucleic acids, classified in at least, for example, class 536, subclasses 23.2 and 23.5.
 - II. Claims 9-16, drawn to CYP3A5 nucleic acids, classified in at least, for example, class 536, subclasses 23.2 and 23.5.
 - III. Claims 17-34, drawn to methods of detecting nucleic acids and selecting disease treatments, classified in at least, for example, class 435, subclass 6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are patentably distinct products. While each of the Inventions are nucleic acid molecules, the molecules of Group I have a different sequence, and therefore a different structure, than those of Group II. Further, polypeptides encoded by CYP3A4 molecules are known to have different functional properties than those encoded by CYP3A5 molecules, and the molecules of Group I and Group II differ further by virtue of including different promoter polymorphisms. Accordingly, the molecules of Inventions I-II are patentably distinct.

Inventions I and III, and II and III, are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the nucleic acids

of Invention I-II may be used in a materially distinct methods, such as methods of making protein.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, and because Inventions I-III require different sequence and text searches that are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner, and therefore restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
